## SPECIFICATION

## Please amend the ABSTRACT as follows:

Embodiments of the present invention include compositions and pharmaceutical compositions comprising citrulline and Hmg-CoA reductase inhibitors. Further embodiments relate to the use of such compositions to treat subjects and stimulating nitric oxide synthase.

Vessels are treated with a mixture of L arginine and an agent which enhances the biotransformation of L arginine into NO. The incidents associated with restenosis are expected to be substantially reduced and prevented providing for a reduced incidence of restenosis as a result of the injury.
